'The Atlas of the Irish Revolution' is a landmark publication that presents scholarship on the revolutionary period in a uniquely accessible manner. Featuring over 200 original maps and 300 images, the Atlas includes 120 contributions by leading scholars from a range of disciplines. They offer multiple perspectives on the pivotal years from the 1912 Home Rule crisis to the end of the Irish Civil War in 1923.

Using extensive original data (much of it generated from newly-released archival material), researchers have mapped social and demographic change, political and cultural activity, state and non-state violence and economic impacts. The maps also portray underlying trends in the decades before the revolution and capture key aspects of the revolutionary aftermath. They show that while the Irish revolution was a 'national' event, it contained important local and regional variations that were vital to its outcomes.
